# TOUCH11/PUB

Operator panel for self-service beer bar.

TOUCH11/PUB is a customer tailored variation of **TOUCH11/PC** operator panel, designed for self-service beer bars.

The base of **TOUCH11/PUB** constitutes a processor board with processor AMD Geode LX800/500MHz with integrated peripheries, RAM and CF. 5.7"LCD display is fitted with analog resistive touch screen.

TOUCH11/PUB is in-built into a rustfree metal case, which is placed on a rustfree tube. In the tube are also placed cables for power supply and communication.

Self-service beer bar (2S2B) equipped with **TOUCH11/PUB** gives the customer the opportunity to draft his beer by himself, using the self-service system with pipe, placed straight on his table. Beer consumption is measured separately for every single customer, does not matter how many people sit around the table. Using the panel, **TOUCH11/PCB**, the customer can choose from the menu and order meal or call the staff.

Information and control system 2S2B enables connection among all beer bars of this kind in real time anywhere in the world.

For more details about self-service beer bars check the web site www.mcat.cz or www.thepub.cz.
